ENSDL203

EURONET SMART DIGITAL LOCK – 203

Premium Five-Method Lever Lock | Direct Wi-Fi

UNLOCK METHODS **5**	FINGERPRINTS **Up to 200**
PIN / RFID CARDS **Up to 200 each**	WI-FI **Direct, no hub**
TAMPER ALARM **Yes**	CERTIFICATIONS **CE, FCC, RoHS**

OVERVIEW

The EURONET ENSDL203 is the premium model in the ENSDL smart lock series, designed for villas, premium homes and offices. A high-resolution capacitive fingerprint sensor, PIN code, RFID card, the Euronet IoT App and a mechanical key give five ways in, with room for up to 200 fingerprints, 200 PINs and 200 RFID cards. It connects directly to Wi-Fi 2.4GHz with no gateway needed, works with Alexa and Google, and adds a tamper alarm mode on top of forced-entry, wrong-code and low-battery alerts. The zinc alloy lever body has a brushed premium finish and fits doors 35–60mm thick.

KEY FEATURES

High-Resolution Fingerprint
Premium hi-res capacitive fingerprint sensor with room for up to 200 fingerprints for many users

Expanded Capacity
Stores up to 200 fingerprints, 200 PIN codes and 200 RFID cards for offices and multi-user villas

Direct Wi-Fi Connection
Connects directly to Wi-Fi 2.4GHz with no separate gateway, plus Bluetooth for local operation

Enhanced Tamper Detection
Tamper alarm mode alerts instantly to any attempt to physically remove or force the lock body

Granular Access Control
Issue time-bound or one-shot passcodes for visitors, cleaners or staff without sharing your own

Always Has a Backup
Emergency USB-C power port and a mechanical key mean you are never locked out of the property

TECHNICAL NOTE

ENSDL203: lever handle, premium finish; high-resolution capacitive fingerprint sensor; up to 200 fingerprints, 200 PINs and 200 RFID cards.
