ENSDL202

EURONET SMART DIGITAL LOCK – 202

Five-Method Keyless Lever Lock | For Apartments & Homes

UNLOCK METHODS **5**	FINGERPRINTS **Up to 100**
PIN / RFID CARDS **Up to 100 each**	WIRELESS **BT + Wi-Fi**
POWER **4 × AA**	CERTIFICATIONS **CE, FCC, RoHS**

OVERVIEW

The EURONET ENSDL202 is a five-method keyless lever lock for rental apartments and homes. It opens by capacitive fingerprint, PIN code, RFID card, the Euronet IoT App or a mechanical key, so there is no single point of failure. It stores up to 100 fingerprints, 100 PINs and 100 RFID cards, works locally over Bluetooth and connects to Wi-Fi 2.4GHz through the Euronet gateway for remote unlock, time-bound or one-shot passcodes and live entry logs. The zinc alloy body fits wooden, metal and composite doors 35–60mm thick and runs on 4 × AA batteries with a USB-C emergency port.

KEY FEATURES

Five Unlock Methods
Fingerprint, PIN, RFID card, app or mechanical key, with no single point of failure for entry

Granular Access Control
Issue time-bound or one-shot passcodes for visitors, cleaners or staff without sharing your own

Alerts in the App
Alarms on forced entry, wrong codes or low battery, with live entry logs in the Euronet IoT App

Cloud + Local
Works locally over Bluetooth even when home Wi-Fi is down; Wi-Fi 2.4GHz is added via the gateway

Universal Door Fit
Replaces standard mortise locks on wooden, metal and composite doors from 35mm to 60mm thick

Always Has a Backup
Emergency USB-C power port means flat batteries will never leave you locked out of your home

TECHNICAL NOTE

ENSDL202: lever handle, capacitive fingerprint sensor; up to 100 fingerprints, 100 PINs and 100 RFID cards. Bluetooth + Wi-Fi 2.4GHz via gateway; Alexa / Google voice. Auto-lock with configurable timer. Alarms: forced entry, wrong code, low battery. Zinc alloy body, brushed finish. Doors 35–60mm (wood, metal, composite). 4 × AA batteries, 8–12 months; USB-C emergency power. -25°C to +70°C. CE, FCC, RoHS.
